## ACQUIS BI (ABI) INVEST IN DUBLIN CITY UNIVERSITY (DCU) SENSOR AND HEALTH REHABILITATION RESEARCH PROGRAM

ABI and DCU develop rehabilitation technology for the chronically ill patients.

Los Gatos, California, 1BNovember 1, 2015– Acquis BI in conjunction with the Science Foundation of Ireland (SFI) have signed an exclusive agreement to develop sensor based rehabilitative healthcare and mobile technology in DCU Ireland.

*“We are very excited to be involved with DCU on this innovative project which could lead to such a positive impact on the health and wellness of people suffering from a range of chronic illness,” said Audrey McKeown C.E.O. of the Acquis BI.*

This project supports the goals of Horizon 2020 and is one more step in of a strategic shift for Acquis BI into the healthcare space and into Europe. DCU were chosen because they have clear vision of the project goals. They bring together a multidisciplinary team including behavioral scientists, Machine Learning and Sensor engineers, computer science engineers and importantly a skilled team from their Health and Human Performance department to deliver a complete end to end prototype team.

### Acquis BI Technology

Over 500,000 people living in Ireland suffer from at least one chronic illness and over 11.7% of American Adults are living with Heart Disease, 28.4 million according to the CDC. Acquis BI is a technology company founded in 2006 to develop business intelligence and collaboration technologies targeted at the government industry. In 2015 Acquis BI decided to extend our enterprise web and cloud expertise deliver a solution with a new approach to the complexities of electronic health record management and health sensor technology.
