## ACQUIS BI (ABI) INVEST IN NEW EUROPEAN TECHNOLOGY DEVELOPMENT AND RESEARCH CENTRE IN IRELAND

Acquis BI step into Europe and into the healthcare market.

Los Gatos, California, 1BSeptember 21, 2015– Connect Ireland have no difficulty getting Acquis BI to expand into Europe via Ireland as Acquis BI announce plans to set up a technology Innovation and development center in Ireland.

*“Acquis BI is ready for Europe and ready to extend our capabilities into new regions and markets. The healthcare technology industry is set to grow at a significant rate with innovative advancements in both sensor and mobile technologies.” said Audrey McKeown C.E.O. of the Acquis BI.*

The decision to choose Ireland was a no brainer for the Irish born CEO, who is familiar with the education system and the quality of graduate engineers from this highly educated and highly skilled nation. LinkedIn estimated a shortfall of software engineers which is expected to expand up to one million by 2020 in the USA. Acquis BI have found the perfect location for a European headquarters both to expand into regional markets and gain access to multilingual and multicultural talent.

*“Ireland has benefited from an intelligent decision to make third level education accessible to all and from the influx of linguistic talent from mainland Europe. We believe this combined diversity will only improve business expansion opportunities in Europe for Ireland based multinational organizations” said Ms. McKeown*

### Acquis BI Technology

Over 11.7% of American Adults are living with Heart Disease, 28.4 million according to the CDC. Acquis BI is a technology company founded in 2006 to develop business intelligence and collaboration technologies targeted at the government industry. In 2015 Acquis BI decided to extend our enterprise web and cloud expertise deliver a solution with a new approach to the complexities of electronic health record management and health sensor technology.
